S 19

Self-tailing winch

SELDÉN

for sailing

S19 Compact Size. Smart Design.

The S19 is a compact, one-speed self-tailing winch designed for sailboats up to approximately 27 ft. It combines efficient handling with Seldén's patented ART (Asymmetric Rib Technology), bringing smart design and reliable performance to smaller keelboats and yachts.

ART Asymmetric Rib Technology

Patented ART drum technology

The aluminium drum features Seldén's patented ART design, with asymmetrically spaced ribs. The varying distances between the ribs provide excellent grip while minimising line wear and allowing smooth, controlled release.

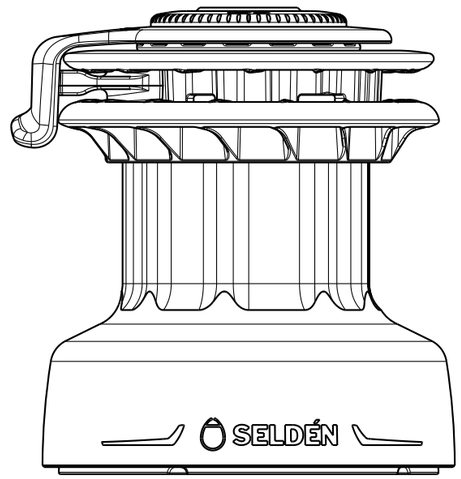

Easy Tacking

The spring-loaded self-tailer holds the line securely with minimal friction, allowing you to pull the slack straight out of the self-tailer with ease.

Before tacking, apply the windward sheet two or three turns around the drum, feed it through the self-tailer and place the winch handle in the socket. As you tack, simply pull the slack through the self-tailer to trim the jib onto the new tack. Fine-tuning is then done with the winch handle, already in place.

TECHNICAL SPECIFICATION

Art. No.	Base diameter, ø mm	Height, mm	Weight, kg	Line size, ø mm	Power ratio	Safe working load, kN	Fasteners
475-119-10	118	134	2	6-12	19:1	5,8	Countersunk M6
